

Little Techie Enrichment Program for PreK

Little Techie teaches more than just computers. Every class brings new experiences designed to teach our young students how to think, creatively, express their ideas, and apply the skills. They are learning to solve problems and accomplish their goals. Our unique approach takes fundamental literacy concepts and brings them to life for children by immersing them in a story where they get to become the main character. Every class combines interactive video and software in a proprietary format that allows children to work in a group setting yet advance at their own pace. Created to incorporate, core literacy and technology concepts, the program is designed to prepare all young children with the skills necessary to succeed in their future

Classes will be held on Mondays throughout the first trimester from 3:00-4:00

September 9, 16, 23, 30

October 7, 14, 21, 28
